

RAWBURN SEMEN CATALOGUE 2024

www.rawburn.com

RAWBURN LOADED

After much consideration we have decided to release semen from our main herd Sire Rawburn Loaded.

His Sire, Nichols Expectation, was the highest bull in the US for Residual Average Daily Gain (feed efficiency & performance) in 2015. Expectation now features in almost all of the highest performing cattle in the UK for Terminal and Self Replacing Index.

His Dam, Rawburn Lady Rose N636, has a faultless breeding record. A daughter of Te Mania Berkley, a bull that excels in calving ease, short gestation and structural correctness. His Dam has a perfect udder and foot structure.

PERFORMANCE

Loaded's calves arrive quickly and with no fuss. His daughters are now in production, they are quiet, fleshy and exceptional mothers. Loaded's performance data is highly accurate and as good as you will ever see.

FEED EFFICIENCY

In the last two feed efficiency trials at Rawburn (112 bulls tested) Rawburn Loaded sired the two highest efficiency bulls. With the average bull requiring 4.35 Kg of Dry matter to gain 1Kg these two bulls required only 3.05 Kg of Dry matter (30% less).

This data shows that Loaded's daughters will also require less acres of pasture to maintain themselves and raise their calf.

RAWBURN ERNAN

No bull has had more impact on the Rawburn herd and bred more high Index cattle in the UK than Rawburn Makka Pakka. Although he has Sired many exceptional sons, we had never bred one that we thought could supersede his achievements, until now. From a young age we recognised Ernan as very special.

Ernan's Dam is a daughter of Rawburn Boss Hogg. Her breeding record is exemplary having calved in the first cycle every year and with her 4 calves averaging 3Kg less

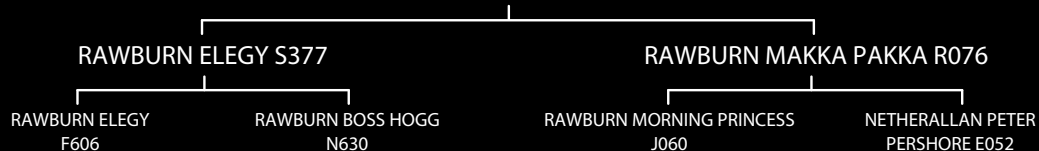

at birth than the herd average. All of her calves to date have weaned off in the top 10% of the herd and account for her amazing milk EBV of 32. His Dam is a maternal masterclass.

With semen no longer available from his Sire, Ernan is the obvious choice.

RAWBURN E TYPE

Pictured at 12 months old

Rawburn E-Type is a real eye catcher. His performance combination of calving ease, growth, and feed efficiency is unique and exactly what we are finding the commercial breeder is looking for. His width of top and depth of hindquarter made him a standout in our 2020 born bulls.

At Rawburn in 2021 we will be again Al'ing heavily to E-Type's Sire Nichols Expectation and using four sons of the bull through natural service. Expectation's influence on our herd and also that of the highest Index cattle in

the UK has been unprecedented. His breeding is tried and tested.

E-Types Dam is a Granddaughter of the great TC Stockman 365. She is a female that never loses condition and always raises an outstanding calf. In 2019 she weaned the heaviest calf in the herd. She is the type of cow that pays the bills.

RAWBURN ROXBURGH

Rawburn Roxburgh (3yr old). Look past the dirt and you'll not find many faults. His pedigree is a complete outcross for the UK and designed for grass/feed efficiency.

Roxburgh has great natural flesh and style with an exceptionally quiet nature. His leg and foot structure are as good as you will see. His natural ability to maintain condition is extraordinary. After nine weeks of running with 38 maiden heifers last summer he came in as fit as when he went out. These heifers are currently calving with no fuss and no assistance.

His Sire, Black Magic is from the Byergo programme where their main focus for the last decade has been measuring and

breeding for feed efficiency. His Dam was our pick of the Jindra herd and a maternal sister to Jindra Double Vision and daughter of the great Hoff Rachel cow.

Like his full siblings, Roxburgh excelled on our feed efficiency trial. In his trial the average bull converted at 4.38kg of Dry Matter to gain 1kg of body weight. Roxburgh only required 3.14kg of dry matter to do the same!!!

Roxburgh is suitable for heifers and cows and guarantees to breed quality. His progeny will be highly efficient converters of grass and feed and will reduce your input costs and increase your profits.

RAWBURN EXCEL

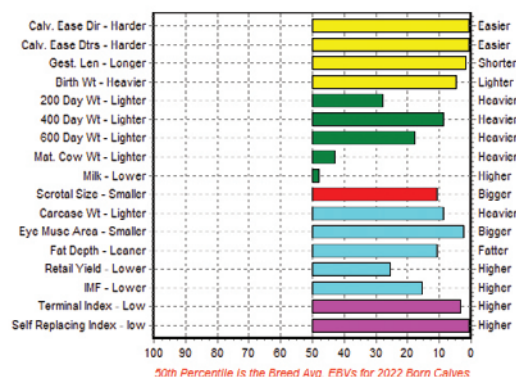

If we have ever bred a young bull that can be described as a 'curve bender' then its Rawburn Excel. Top 1% calving ease, top 5% Terminal and Top 1% Self Replacing Index. Additional to his numbers he has great fleshing, fantastic feet and legs and real Angus character.

Excels pedigree is designed for calving ease without compromising on quality. His Sire, Quaker Hill Dead Centre, has made a name as an ultra easy calving, easy fleshing bull. His Dam Rawburn Elsie is from our number one calving ease line at Rawburn and is a direct daughter of the great Rawburn Transformer.

If you are looking to breed hassle free cattle that don't compromise on quality then Rawburn Excel is the perfect choice!

BOSS HOGG

What a bull! With progeny in over 100 herds in the UK, Boss Hogg's numbers are as accurate and as good as you can get. Low birth weight, good growth and 33 for milk!

His outcross pedigree leaves nothing to chance. His Dam is a maternal sister to Hoff Limited Edition. We regard her as the best female we have ever owned in North America. Angus cows rarely come as powerful, yet maintain such femininity and class.

His sire TC Freedom is a breed legend that has proven himself as a consistent breeder of growth, muscle and

milk with moderate birth weights. A bull that not only looks great but also produces cattle that are functional and desired in the show and sale ring.

Boss Hogg guarantees to breed easily born, fast growing calves. His sons will be the first out the sale pen and a certainty to please your customers. His daughters will wean your heaviest calves. They are a maternal masterpiece.

With semen stock getting low this will probably be the last year Boss Hogg will be available.

BANNOCKBURN

Rawburn Bannockburn is designed for maximum feed efficiency without the compromise on growth and breed character.

In 2016 we purchased his Dam, Nichols Bonnie Y292, from the Nichols herd in Iowa. This cow was identified and selected due to her exceptional performance and traits for feed utilisation. Bonnie's 2015 born son shattered every record in the Nichols herd for Residual Average Daily Gain (feed efficiency and growth).

Bannockburn's Sire, QH Rampage, is one of the most dominant sires ever in the US. A bull renowned for exceptional growth, structural soundness and fertility.

Bannockburn is designed to breed cattle that are born easily, grow quickly with an unrivalled ability to turn grass or feeding into red meat. Put no extra in and get greater returns!

JUMBO ERIC

Don't you love it when a plan comes together! Jumbo Eric is exactly what we hoped would result from mating the UK's highest Index cow with one of the most dominant sires in the breed today.

Jumbo Eric's Dam is a performance giant that always breeds something very special. She has already bred three five figured sons Rawburn Jackson Eric (Skaill), Rawburn Jumbuck Eric (Skaill), Rawburn Jingo Eric (Lindertis).

Jumbo's Sire, Gretnahouse Blacksmith, is a bull that combines performance with faultless breed character and style. His sons have been amongst the most sought after in the UK in recent years.

Staggering performance, Easy calving and quiet. His stunning head is backed up with one hell of a carcass!

BLACK HAWK

Black Hawk is one of the most complete bulls in the breed today. Every year his performance figures just get better and better as more of his progeny are recorded and start production. With the exception of Rawburn Transformer we are not aware of a bull that has bred more Champions and high sellers with a calving ease above +3.

Rawburn Black Hawk's offspring have had great success at bull sales and shows around the UK. His sons and daughters have won numerous championships including

Overall Champion at the Royal Welsh Show and Male Champion & Junior Champion at RHS. His Progeny were Champion Sire Group at Stirling bull Sales and in October 2016 his daughters sold to a top of 15,000gns and averaged £10,675.

For proven consistency and quality look no further than Rawburn Black Hawk.
